Client Testimonial for HOWES COMMERCIAL & INDUSTRIAL

6th April 2009

I heard about Howes Commercial & Industrial by personal recommendation, whilst searching for someone to source and operate equipment for a customer.

Howes Commercial & Industrial were approached by myself to undertake work at a customers premises. Following an initial consultation with myself, Howes did a site inspection, and after completing a risk assessment, and sourcing of suitable equipment, returned to me with a complete package comprising of all necessary documentation and proposed plan.

At a date specified by my customer, the equipment arrived on site and the whole operation was supervised at all times by Howes. The work was completed on time and to budget, with particular attention to safety

Having seen the documentation regarding Health & Safety and Risk assessment, it has certainly increased my awareness of planning and working at height.

At all times I found the level of service from Howes Commercial & Industrial excellent and totally professional I would have no hesitation in recommending Howes Commercial & Industrial to anyone, and will be my first call if I have similar requirements in the future.
